> Software engineer with 5+ years building production web applications in React, Next.js and TypeScript. Currently sole frontend engineer on a business intelligence platform, where I set the frontend architecture and development standards and own the backend services behind it in FastAPI, Python, Docker and GCP. Bilingual (English/Spanish).

EXPERIENCE

Oct 2025 — Present
Lake Worth Beach, FL

Web Developer / ConsumrBuzz

Cerebro — Business Intelligence Platform

Sole frontend engineer with backend ownership on a full-stack BI dashboard for business listing management, automated publisher scanning and analytics reporting.

- Led all frontend architecture decisions and established the team's development standards
- Designed a scalable Next.js application on strict TypeScript patterns and a modular three-layer architecture
- Built an entity management system covering publishers, SMBs and agencies, with role-based dynamic navigation
- Shipped analytics dashboards and monitoring for automated scraping jobs
- Built REST APIs in FastAPI behind a secure data-access layer, and integrated the Google Business Profile API for listing synchronization
- Containerized services with Docker and managed deployments on GCP
- Delivered authentication, bulk upload, billing and document management modules
