Full-stack engineer with 5+ years shipping production web apps in React, Next.js, and TypeScript, and owning features end to end across FastAPI, Node, and Supabase/Postgres backends. Takes products from an empty repo to launch: secure authentication, role-based dashboards, internationalization, and performance work. Bilingual in English and Spanish.

Skills

Core stack	**React, Next.js, TypeScript, React Native, FastAPI, PostgreSQL**
Frontend & mobile	JavaScript, Tailwind CSS, shadcn/ui, HTML & CSS, TanStack Query, Zustand, Redux, Expo
Backend & data	Python, Node.js, Express.js, Django, Supabase, MongoDB, GraphQL
Cloud & DevOps	Docker, Railway, GCP, AWS, Azure, CI/CD, Git & GitHub
Integrations	Stripe, Azure AD, AWS Cognito, Twilio, OpenAI
Testing	Jest, React Testing Library

Experience

Software Developer

Oct 2025 - Present

ConsumrBuzz · Lake Worth Beach, Florida · Hybrid

Built ConsumrBuzz, a full-stack business intelligence dashboard for business listing management, automated publisher scanning, and analytics reporting — owning the frontend end to end and contributing across the backend.

- Owned the frontend as its sole engineer, from first commit to production
- Architected and built the complete frontend from scratch using Next.js 15, React 19, and TypeScript
- Implemented a three-layer data flow architecture (Client Components > TanStack Query Hooks > Server Actions > DAL > API), ensuring secure authentication handling
- Built a role-based access control system supporting 7 roles across Admin, Agency, and SMB dashboards
- Integrated Kinde Auth with secure server-side token management, preventing client-side token exposure
- Implemented full internationalization (i18n) supporting English, Spanish, and French with next-intl

Next.js · React · TypeScript · FastAPI · Python · Railway · Tailwind CSS · shadcn/ui · Kinde Auth · next-intl

Frontend Developer

Oct 2024 - Oct 2025

Second Window · Alicante, Spain · Remote

Led frontend development for AI-powered educational platforms and a multi-cloud infrastructure visualization tool, delivering two production applications end to end.

- Established a reusable component library and development standards that improved team velocity by **40%**
- Architected and shipped two production web applications for AI-driven educational services from concept to launch
- Built an interactive drag-and-drop cloud infrastructure designer with XYFlow supporting AWS, Azure, and GCP resource provisioning
- Integrated Azure AD SSO authentication and Stripe subscription billing with webhook handling
- Implemented a real-time cost estimation engine calculating infrastructure pricing across three cloud providers

React · TypeScript · Tailwind CSS · Zustand · XYFlow · Azure AD · Stripe API · Jest

Web Developer

Mar 2024 - Oct 2024

Freelance · Alicante, Spain · Remote

Built the frontend of a sports betting platform as part of a team: real-time odds, live data feeds, and secure user authentication, deployed on AWS.

- Shipped in 6 months with **95%** test coverage and **sub-2s LCP**
- Built a React SPA for sports betting with a team, with live odds updates across multiple sports categories
- Implemented an end-to-end authentication flow with AWS Cognito, including MFA and session management
- Deployed via an AWS Amplify CI/CD pipeline with automated preview environments per branch

React · TypeScript · Tailwind CSS · AWS Amplify · AWS Cognito · Jest

Web Developer / IT Specialist

Jan 2023 - Mar 2024

Legacy BHC · West Palm Beach, Florida · On-site

Built enterprise internal tools for a behavioral healthcare company, digitizing employee certification tracking, vacation management, and HR workflows.

- Cut administrative overhead by **60%** for **200+** employees
- Developed a full employee management suite with Next.js and MongoDB, replacing manual spreadsheet-based processes
- Translated complex Figma design systems into pixel-perfect, responsive React components

Next.js · TypeScript · Tailwind CSS · MongoDB · AWS · Jest · Figma

Web Developer & IT Specialist

Sep 2019 - Dec 2021

ETECSA · Santa Clara, Cuba · On-site

Developed internal web applications for Cuba's national telecommunications company, building management systems that streamlined regional operations for thousands of users.

- Delivered a telecommunications management platform serving **10,000+** daily users across regional offices
- Built a phone line transfer management system that automated previously manual workflows, improving regional processing efficiency by **40%**
- Developed an employee feedback and evaluation platform with a React frontend and a Django REST API backend

React · JavaScript · Tailwind CSS · Django · MongoDB · Jest · Git

Personal projects

BookEasely, appointment booking, web and mobile

bookeasely.com

- Next.js web app and Expo mobile app on one Supabase backend
- Real-time availability and booking engine with Postgres RLS

Next.js · React · TypeScript · Expo · React Native · Supabase · Twilio · Tailwind CSS · shadcn/ui

ReviewBoost, review management for local businesses

review-boost.app

- Google Business Profile OAuth to sync reviews and post replies
- AI-assisted replies and a pg_cron sync every 30 minutes

Next.js · React · TypeScript · Expo · React Native · Supabase · Google Business Profile API · OpenAI · Tailwind CSS · shadcn/ui

Education

B.Sc. Software Engineering, Universidad Central Marta Abreu de Las Villas — 2016 - 2021

Languages

Spanish (native) · English (professional)
